Examining the Utility of Cognitive and Psychological Assessments for Special Forces Selection

Melanie Cooper
Brett Murdoch
David Said
Philip Temby

Data Collection and Management

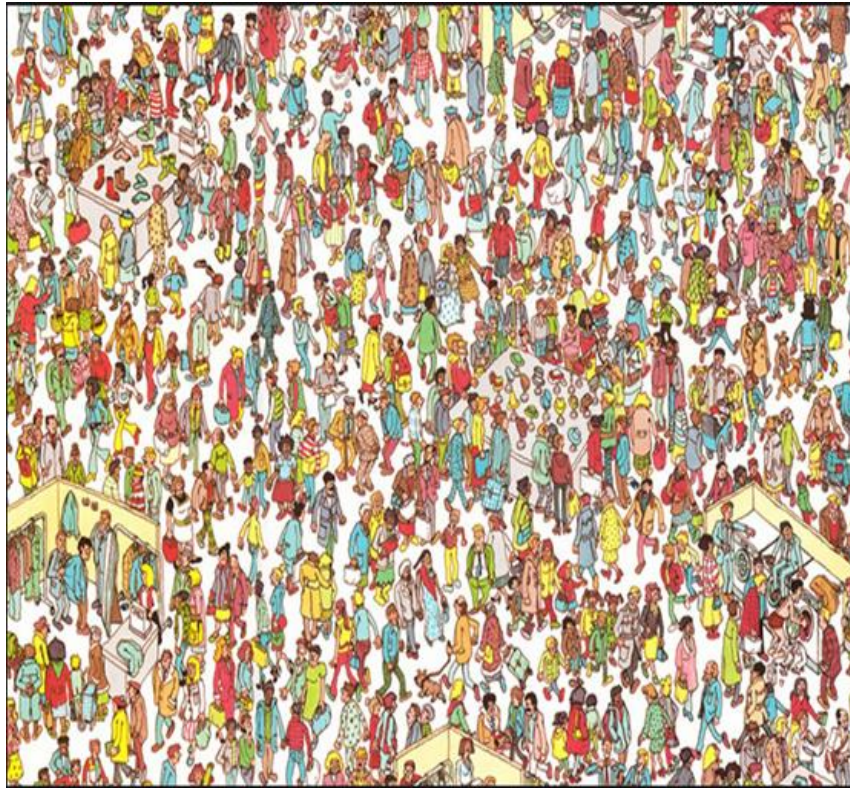

“As the SF core values underline, the selection and training of the core ‘operator’ is the basic unit of capability; professional mastery and the pursuit of operational excellence is expected, and SF cannot be mass-produced. These values are underpinned by the importance of the process that is SF selection....its value as a force generation and force multiplication tool cannot be overstated.”
COL Ian Langford (2014)
